

Move to ZE Cloud

Agile, Scalable, Reliable,
Efficient and Cost Effective

**Trusted by
Fortune 500
Companies**

ZE Cloud is a complete converged Cloud Platform that provides simplicity, integration, and manageability. Leveraging best-in-class software and hardware technologies including lightning-fast flash storage, ZE Cloud tackles the challenges of the public cloud, eliminating the potential of runaway costs and staff overheads while delivering performance for intense data needs.

Built for Performance

Built with simplicity and elegance, architected and optimized specifically for ZEMA performance, ZE Cloud is focused on integration with the data and platforms you want to use.

Move at Your Pace

Migrating to ZE Cloud is easy. We'll work with you to help integrate ZE Cloud into your workflow, moving at a pace that's right for your business needs.

Secure Connectivity

Our solution ensures your data can remain in compliance for sensitive or regulatory data, including GDPR and SOC 2 Type 1. We offer options for secure connectivity between ZE Cloud and your local systems.

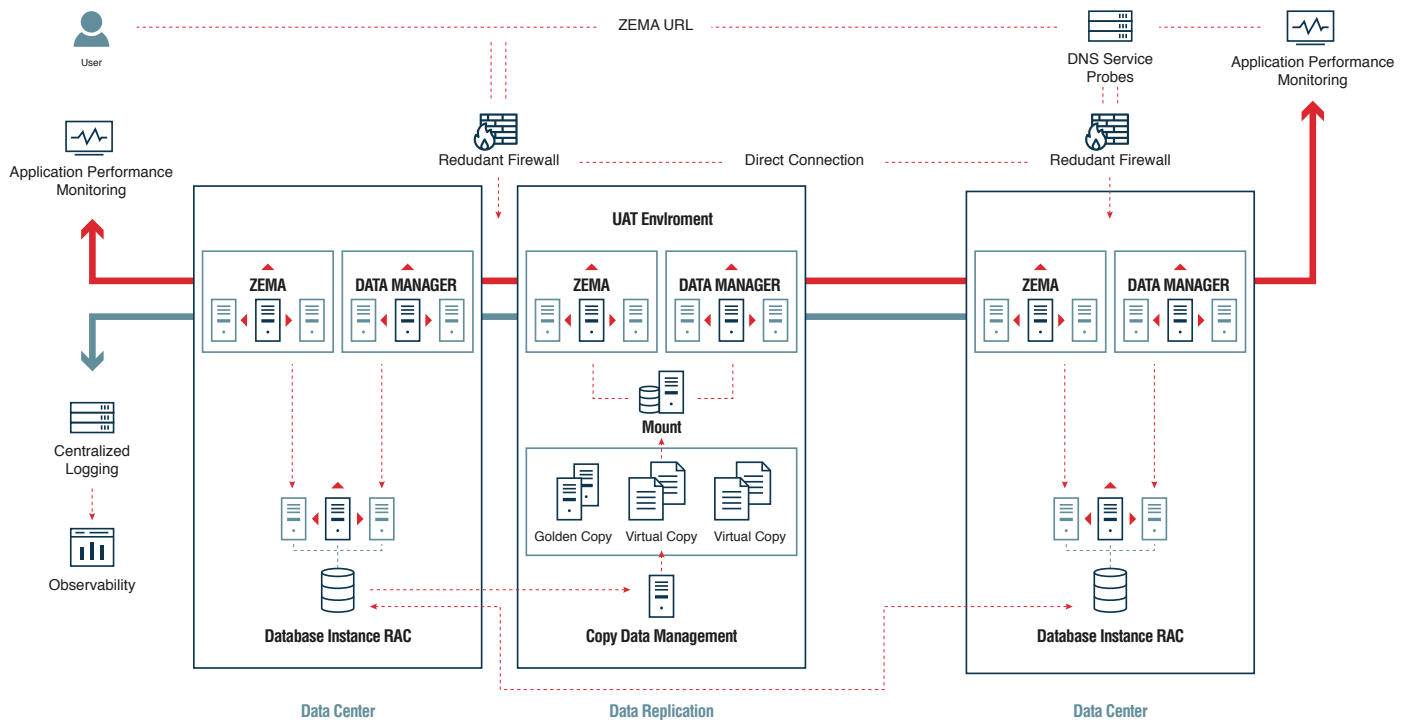

Our Award-Winning Private Cloud Delivering Your Data

DATA MANAGEABILITY AND FLEXIBLE DEPLOYMENT IN THE CLOUD

Our custom ZE Cloud tools deliver a complete converged Platform offering multi-tenant and single-tenant ZE Cloud deployment options.

Take command of your cloud experience with flexible deployment options from our scalable, dedicated cloud solution. Deploying on the ZE Cloud is painless, with our teams taking on the heavy lifting, requiring no local IT resources.

Cloud computing can be a challenge in situations where contractual or regulatory issues require data to be contained behind a firewall or in an existing data warehouse. Our secure, private cloud solutions has you covered with options.

FLEXIBILITY

Leverage Your Data – Anywhere, Anytime

ZE Cloud is a powerful technology platform that lets you extend the power of ZEMA by providing a wide range of push and pull options that support easy and flexible connections.

System Integration

ZE Cloud integrates with most Energy Trade and Risk Management systems, as well as common Business Intelligence, Machine Learning and ERP systems.

Highly Flexible

As a Data-driven organization, you need flexible and fluid access to data and applications. With the push/pull integration capabilities you can request data queries, or access the ZEMA business layer. ZEMA also allows REST and SOAP-based services for language-agnostic communication and application-specific integration.

SECURITY AND AVAILABILITY

ZE Cloud was built with stringent security in mind, meeting compliance requirements. It's resilient, with integrated disaster protection, with simultaneous failover to our cloud DR service. ZE Cloud guarantees resource availability, ensuring confidence that your data, governance, and operation policies will be protected. ZE Cloud features Single Sign-On and Active Directory integration, delivering controlled, secure access.

ZE Minimizes Your Business Risk

With ZE Cloud we deliver a category-one cloud service that is SOC 1 Type 2 compliant, under stringent SLAs designed to run your data management and business applications.

Because Anything Can Happen

ZE Cloud was designed to host the ZEMA application – no other cloud host can provide that. Your organization can scale out transparently, scale up instantly, and run continually without experiencing disruption or downtime.

Data Availability and Reliability

ZE has geographically dispersed, state-of-the-art secure Tier II data centers to deliver worry-free service. If disaster strikes we have you covered with security, redundancy, and fault tolerance while providing you with 99.9% availability.

DISASTER RECOVERY

Protect your organization from critical data loss with best practices and relevant consultation on implementing a ZE Disaster Recovery environment including:

- Participation in Disaster Recovery test simulation scenarios
- Regular monitoring
- Providing a point of contact and support for a Disaster Recovery environment in the event a disaster recovery is required
- A unique-to-you Business Continuity Plan

Access ZE's Unrivaled Data Ecosystem

Our tools can be tailored to meet the unique needs of your business: select your data sources and quickly leverage the analytics and data automation your team needs to succeed. Rapidly build or integrate custom apps with APIs to connect to proprietary systems in real-time.

Hundreds of Sources

With data from hundreds of sources already on ZE Cloud, you can get the industry-centric or role-specific insights your company needs, instantly.

Connect and Control

Maintain tight control of your data by creating authenticated API-driven access calls to manage data from the data platform.

Build and Integrate

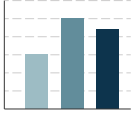

Our tool set is extensive, letting you choose how and what you want to integrate with.

Flexible Data Platform

ZE Cloud lets you control how you extract or upload your data. In addition, we provide APIs so you can leverage ZE Cloud alongside your existing systems to optimize your operations.

PROFESSIONAL SERVICES AND SUPPORT

Unlock the greater value of ZEMA with ZE Managed Services. Our dedicated experts provide a wide range of monitoring and technical services so your organization gets maximum value from your ZEMA installation, enabling you to accelerate your path to success in the cloud.

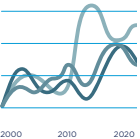

Data Monitoring and Troubleshooting

Our Data Monitoring service monitors and validates data imported into ZEMA according to a well-developed set of business and technical rules. We assess the completeness, timeliness, and accuracy of all information stored in ZEMA's data library, troubleshooting potential data collection problems as they arise and take action where appropriate.

Application Monitoring and Troubleshooting

We ensure maximum uptime of each component of the ZEMA solution, reviewing application logs, checking for application uptime, investigating data processor issues, and troubleshooting other identified errors.

Curve Monitoring and Troubleshooting

Our Curve Monitoring services include monitoring and confirming successful builds of curves according to scheduled build times. Our technical staff is trained to troubleshoot and debug data collection, data cataloging, curve scheduling, profile logic, and data transformation errors. Curve monitoring is only available for clients licensed with ZEMA Curve Manager.

Database Monitoring and Troubleshooting

We make sure that the database environment is stable, optimized, and well suited to its specific purpose. We break down tasks into scheduled and regular duties, applying scripts, monitoring performance, applying indexes, creating partitions, and performing other related tasks.

Scale and Support

Whether you're a startup with 5 users or an enterprise firm with 10,000 seats, ZE Cloud scales to meet your needs. As a flexible platform, ZE Cloud is not constrained to one specific model or deployment methodology.

Education

We offer implementation and consulting services, as well as product tutorials for new and existing customers. We provide a wide variety of learning resources through our training services and through our online ZE Community.

Get the Expert Support

Our 24/7/365 support services are backed by a dedicated team of support professionals who are ready to address your needs and questions."
